

Swifts Local Network

Who we are!

The **Cambridge Swift Conference in April 2014** inspired the formation of this UK-based network, which allows the many small groups and individuals working on Swift conservation to share experiences and expertise, and work together closely.

Knowing there are plenty of others with whom we can share problems, successes and experiences while enjoying mutual support is resulting in an enhanced contribution to Swift conservation.

What we do!

- Encourage interest in Swifts
- Raise awareness about the risks from building alterations etc. and advise about options
- Give talks to local groups
- Survey and monitor local populations of Swifts
- Encourage local authorities to make provision for Swifts in new developments
- Promote Swift-friendly building amongst builders and architects
- Give advice on installation of nest boxes and call systems
