

A Multi-Box offering three Swift nest places & one Bat Roost area for Pipistrelles

Materials: please check all dimensions before cutting & assembling!

12.5mm WBP (exterior quality) high-quality plywood throughout
 Bat landing strip (150mm high) and roost area (both its interior sides) are to be roughened or grooved on the inner side to give bats a grip
 All joints to be screwed and glued with weather-proof adhesive

Fixings: Strong rust-proof bolts inserted through top and bottom of rear panel into sound wall

Roof: To be covered with roofing felt, or similar waterproof sheet; roof MUST be waterproof!
